"My body has responded to the mobile radiation for 25 years" Aftenposten, Norway 15Aug2015

»Gro Harlem Brundtland spoke out about the Norwegian campaign, her time as Norway's first female prime minister, and her concern for radiation from mobile phones.«

Dr. Gro Harlem Brundtland, MD, was Director-General of the World Health Organization from 21 July 1998 to 21 July 2003. In 1981, at the age of 41, she was appointed Prime Minister for the first time. Gro Harlem Brundtland was the youngest person and the first woman ever to hold the office of Prime Minister in Norway. With two other periods as Prime Minister from 1986-1989 and 1990-1996, Dr Brundtland was Head of Government for more than 10 years. In 1983 the then United Nations Secretary-General invited her to establish and chair the World Commission on Environment and Development. She is now a [Special Envoy on Climate Change](#) for the [United Nations Secretary-General, Ban Ki-moon](#).

Appendix 1: Interview with Dr. Gro Harlem Brundtland, excerpt in English:

[Dr. Gro Harlem Brundtland, ex-Director General of WHO, discusses her electrosensitivity](#)

Aftenposten, 14th August 2015

(Shared from Juhana Harju - article translation, interview in Norwegian)

Brundtland: »My body has responded to the mobile radiation for 25 years.«

Gro Harlem Brundtland spoke out about the Norwegian campaign, her time as time Norway's first female prime minister, and her concern for radiation from mobile phones.

You can see all the questioning of Norway's former prime minister Gro Harlem Brundtland in the window at the top of the article.

The broadcast was recorded on the sailing vessel 'Boy Leslie', which is berthed at Pollen in Arendal. Until Tuesday is the annual policy conference Arendalsuka held in the southern town.

In this, they told Brundtland, former Director General of the World Health Organization, among others about his skepticism about radiation from mobile phones.

Brundtland: » I would say: Screen you. Do not go with your phone in your pocket.«

Headaches from mobile use: She even uses cell phone as little as possible and are keen to keep the phone away from your head if she, for example, had to send a text message.

Brundtland: » I can not have mobile rays up here. When I get instant headache. My body has responded to the mobile radiation for 25 years.«

The former Norwegian prime minister believes research results show that there is no doubt that there are negative aspects of the waves that hit people because of cell phones and other technological devices.

A committee of experts established by Norwegian authorities concluded in 2013 that there is a coating to say that radiation from mobile phones, wireless networking and mobile phone masts is harmful or may cause health problems...
